RADIOGRAPHIC INTERPRETATION

NAME	TAPARRI 19	DATE	31AUG20
CONSIGNOR	WOODFORD THOROUGHBREDS	HIP #	K2009-2793
DVM	NR MITTS	SITES	REPOSITORY

The clinically significant radiographic findings* are listed below:

Left fore fetlock	NSA
Right fore fetlock	NSA
Left knee	NSA
Right knee	NSA
Left hind fetlock	NSA
Right hind fetlock	very mild sesamoiditis—biaxial
Left hock	NSA
Right hock	NSA
Left stifle	NSA
Right stifle	NSA
Read by	Nathan R. Mitts
Signature	<i>NATHAN R. MITTS</i>

* NSA = no significant abnormalities

These radiographs were taken as a survey of the most common sites for a lesion. They are not, nor are they meant to be a complete examination of the joints taken. They will identify approximately 90% of the common lesions. To identify the remaining infrequent lesions or to provide complete coverage of all joints would require many more views. These survey views usually represent the best combination of coverage and economics.
